CAREER OBJECTIVE

Aspiring AI and software engineer with a strong foundation in machine learning, generative AI, and full-stack development, and a keen interest in problem solving, seeking an opportunity to build scalable, intelligent systems that address real-world challenges.

EDUCATION

B.Tech - CSE , Keshav Memorial Institute of Technology CGPA: 9.2	2023 – 2027
Board of Intermediate Education, Telangana - MPC , Sri Chaithanya Jr. College Percentage: 98.6	2021 – 2023
Board of Secondary Education, Telangana - SSC , Krishnaveni Talent School CGPA:10.0	2021

SKILLS

Programming Languages

Java, C++ (Arduino), Python

Databases

SQL, MongoDB

Developer Tools

Git, Jenkins, Postman

Data Visualization

Power BI

Web Development

HTML, CSS, Bootstrap, JavaScript, Express.js, React.js, Node.js

AI/ML & LLMs

Deep Learning (ANN, CNN, RNN), LLM APIs, RAG Pipelines, Prompt Engineering basics, LangChain, Edge Impulse

Core Concepts

OOPs, Data Structures & Algorithms

PROJECTS

GraphRAG AI 🌀, Hybrid Retrieval-Augmented Generation System

- Built a hybrid RAG system combining vector search (ChromaDB) and knowledge graph (Neo4j) for context-aware responses
- Designed document ingestion pipeline with chunking, embedding, and semantic retrieval
- Implemented a hybrid retriever enabling multi-hop reasoning using graph traversal
- Integrated LLMs for grounded response generation with reduced hallucinations
- Developed backend APIs and a React-based interface for chat and document interaction
- **Tech stack:** Python, Flask/FastAPI, ChromaDB, Neo4j, LLM APIs, React

MedPharmaAI 🌀, AI-Driven Platform for Lung Disease Diagnosis and Accelerated Drug Discovery

- Developed a web-based healthcare and pharma research platform using the MERN stack
- Integrated UNETR model for lung tumor segmentation from medical images
- Built GenAI-based SMILES masking for molecular completion
- Built protein to SMILES converter using Transformer model
- Added 3D medical/protein visualization
- **Tech stack:** MERN, GenAI, Machine Learning

EchoEase 🌀, IOT based voice enabled home Automation System

- Developed a voice-controlled IoT system for smart home appliance monitoring and control
- Integrated real-time voice command processing for automation tasks
- Built asynchronous communication with a custom async web server
- Integrated Sreed Studio XIAO ESP32 with microphone module for voice input
- **Tech stack:** MERN, Edge Impulse, Async Web Server
- **Hardware:** ESP32, Sreed Studio XIAO ESP32, Microphone module

ACHIEVEMENTS & ACTIVITIES

- SIH 2025 – Waitlisted for Smart India Hackathon, recognizing innovation and problem-solving.
- Academic Excellence – Consistently maintained top academic performance.
- DSA – Solved 500+ LeetCode problems.
- Participated in Google Developer Groups (GDG) on Campus – Solution Challenge, Codenovate 2.0 - Technical Coding Event and Prakaalp Project Expo.
